

REMOVABLE MOUNTING STRUCTURE FOR INSTALLING AND ACCESSING A COMPUTER DRIVE IN A COMPUTER

ABSTRACT OF THE DISCLOSURE

Installation and servicing of a computer drive from outside the confines of a computer can be accomplished through use of a removable mounting structure on which one or more drives can be attached. After a drive is fixed to the structure, the assembly can be installed in a computer. Once installed, the assembly can be removed to access or replace the drive. The invention can be used to install and access drives, including floppy drives, hard disk drives, and CD-DVD drives, and a single structure may be able to accommodate drives of different sizes. The invention may be implemented in a small form factor computer or other PC.
